For the attention of GH Ticehurst Esq

Dear Sir,

In reply to your letter of 26th July 1973 we have now obtained the following information from France on the Stamps air cylinder.

Working pressure 30 kg/cm² (approx 435 $\frac{16}{cm^2}$)

Bureau Veritas used to require the cylinders to be tested every 10 years, but now require a test every 5 years.

After a satisfactory test will you mark the date of test on the cylinder either by stamping or painting on at your discretion.

Yours faithfully

K F PARFITT
Surveyor
